

ONE IT
SERVICES & SOLUTIONS

Understand your students' mental health, and help those who need it most

Many students struggle to manage feelings of stress, anxiety, depression, and grief. These facets of mental health affect students' behavior and academic outcomes. Without the proper support and interventions, they can even lead to violence, self-harm, or suicide.

Despite their best intentions, student safeguarding teams are stretched thin. Often supporting hundreds of students each, these DSL's may lack the resources to know for sure which students are suffering and most in need of support.

That's where Securly Aware comes in. Securly Aware is a student safety and wellness solution that provides unprecedented visibility into your students' mental health and wellness. The data provided by Aware can help you understand and meaningfully impact your students' wellness. With Aware, you can:

- Know who's at risk of self-harm, suicide, depression, violence, and bullying
- Proactively support students who demonstrate concerning behaviors
- Gain a clear picture of each student's current wellness level
- Intervene quickly when wellness levels drop
- Respond effectively to student safety concerns

How Aware works

Features

New features to support complete student wellness

Wellness Levels

- Know and easily visualise each student's emotional wellbeing— and respond proactively if levels begin to drop.

Wellness Pathways Widget Wellness Intervention

- Present students with mental health resources if their wellness levels decline with the Wellness Pathways Widget.

Think Twice Bullying Intervention

- Curb cyberbullying with Think Twice, which analyses student posts and emails to detect hurtful content, prompting them to reconsider before sending.

Responder Case Management (Optional Add-on)

- Manage cases with Responder, the battle-tested case management tool used by the Securly 24 monitoring experts.
- Track a flagged alert from its inception to resolution, and be more effective when responding to alerts.
- Gain detailed case records, which can be invaluable for responding to legal depositions as well as for training and development of student services staff.

Comprehensive Scanning of Students' Online Activities

- Google Drive files, OneDrive files, emails, social media, and web searches are scanned to identify indications of suicide, depression, violence, bullying, and nudity.

Flagged Activity Alerts

- Receive real-time alerts of concerning student activities via email so designated staff can view all alert notifications and activity in their assigned OUs.

Sentiment Analysis

- Detects the actual sentiment behind posts, even when traditionally flagged keywords are not included.

Email Recall

- Emails containing violence, bullying, and nudity are automatically recalled.

File Quarantine

- Google Drive files containing nudity are automatically quarantined.

At-Risk AI

- At-Risk AI conducts a nuanced analysis of flagged events, including a student's activity history, to determine a student's Wellness Level.
- Wellness Levels are continuously monitored and updated based on student activity.

Minimal False Positives

- Trust the longest-learning AI in education to provide more reliable alerts and minimise alert "noise."
